

glerups

Our passion is felt

friendsheep *— forever —*

In 1993, Danish mother Nanny Glerup hand crafted a pair of slippers using the natural wool from her own Gotland sheep. So well were the slippers loved by family and friends, that Nanny's hobby soon became a small-scale production – two pairs a day! That was the beginning of glerups.

Nanny and her husband Ove worked hard over the years to improve glerups. Many machines and tools were invented and trashed to keep up with growing demand for this indoor shoe. Today, glerups “addicts” all over the world get their daily “fix” of 100% pure, natural wool that is still crafted with love and care from the sheep to your foot.

We hope you enjoy the all year comfort of your new glerups.

comfort unlimited

— because your feet deserve it —

HAND CRAFTED FROM 100% PURE NATURAL WOOL

The wool is washed in soft water, then carded and felted. The felt is formed into socks, which are steam-felted for a perfect fit before soft calfskin soles are glued, then sewn on, for long lasting durability.

HOW NATURE CREATES WOOL

The technical wonder of wool starts at the root of the fiber. Before leaving the sheep's follicles each wool fiber is coated in sweat salts and grease (lanolin), which together form a perfect "clothing" for the sheep. The lanolin protects the wool fiber against sun, rain and wind. The lanolin and the lye in the sweat salts work together to keep the sheep clean. When the sheep gets wet, the basic salts of lye dissolve and together with the lanolin form a natural "soap" to keep the sheep clean. The sheep can keep the same "clothes" for many months without being uncomfortable. glerups' soft water wash has the same effect. It activates the salts of lye and lanolin to create the natural "soap" just like in nature, to clean the wool.

In the wool fibers' outer layers, fat and protein are so tightly bound to each other that the wool fiber is completely closed to fluids. Water vapor can pass through to keep you comfortable while sweat cannot get into the actual wool fiber ensuring less perspiration odor to keep people around you comfortable.

Wool keeps the sheep's bare skin just the right temperature and it will do the same for your bare skin. We recommend that you try your glerups without socks. Wool and skin work naturally together.

— Unforgettable — moments

FROM FARM TO FOOT

*glerups started with wool from
the family's own Gotland sheep.*

*But at glerups, we never stand still! Over the years glerups
perfected the wool mix by blending Gotland wool with
soft quality wool from New Zealand farmers.*

*These farmers meet our high standards for consistent
quality and humane animal welfare.*

*We work with our farmers every step of the way and
follow each pair of glerups from the sheep to your feet.*

— True Danish —
craftmanship

*After the sheep are sheared, glerups wool goes
through many processes and hands to
ensure the highest quality and a perfect fit.*

We take our time to make it right.

*This is true Danish craftsmanship,
down on the farm.*

Danish hygge

[HOO GA]

- 1. The art of building sanctuary and community of inviting closeness and paying attention to what makes us feel open hearted and alive.*
- 2. To create well-being. Connection and warmth.*
- 3. A feeling of belonging to the moment and to each other.*
- 4. Celebrating the everyday.*

The soles

RUBBER SOLES

Our natural rubber soles meet the strict environmental requirements of the EU. The rubber soles are designed and constructed with a special pattern that provides a better grip on different surfaces.

LEATHER SOLES

Our semi-vegetable tanned leather soles meet the strict environmental requirements of the EU. The skins are tanned using the most modern and environmentally friendly methods and are free of PCR, AZO dyes and Chromium-VI.

The Innersole

Create the glerups feeling and comfort in your boots, sneakers and shoes with our innersoles in 100% natural wool.

Warning!

— addiction can occur —

- ① *glerups will adjust to your foot shape after just a few uses, making them more comfortable. Double-layer inner sole optimizes comfort.*
- ② *Wool 'breathes' to keep feet comfortable no matter what the ambient temperature. We suggest you wear glerups without socks.*
- ③ *glerups unique felting process removes the itch of wool. 100% pure natural wool and 100% no itch.*
- ④ *Wool fibres wick moisture away from your skin and release it to the air, essentially a self-cleaning process unique to wool.*

— The special —
treatment

HOW TO CLEAN AND CARE FOR YOUR GLERUPS

- ① *Since wool has a natural ability to self-clean, your glerups will stay fresh if you simply air them out and allow them to rest.*
- ② *To remove stains we suggest that you gently clean on the stain with a light wet cloth and wool soap. You may have to repeat the process a few times, but make sure that you always leave the slippers to dry before starting over again.*
- ③ *Vacuum or blow your glerups clean of dust. Leather soles can be brushed and cleaned with a leather brush.*
- ④ *Rubber soles can be wiped with a wet cloth – make sure that they get some time to dry after cleaning.*
- ⑤ *Please be careful – natural rubber or leather soles may be slippery on wet and icy surfaces such as tile.*
- ⑥ *All our uppers are produced in 100% pure and natural wool and therefore you may experience colour difference from batch to batch.*
- ⑦ *Your glerups usually shed within the first 3-4 weeks of wear giving you a long-lasting comfortable feel for years to come. This is normal due to the natural treatment of our wool. Simply pluck the shedding fibers off and discard as desired.*

HOW TO MEASURE THE LENGTH OF YOUR FOOT PROPERLY

1. Place the heel against a wall.
2. Measure from the wall to the tip of your longest toe. One foot is often longer than the other, so measure the longest foot. For children add 10mm to the measured length, leaving room for small feet to grow.
3. For more info check out glerups.dk. or glerups.com
