

Our passion is felt

# *friendsheep* — forever —

*In 1993, Danish mother Nanny Glerup hand crafted a pair of slippers using the natural wool from her own Gotland sheep. So well were the slippers loved by family and friends, that Nanny's hobby soon became a small-scale production – two pairs a day! That was the beginning of glerups.*

*Nanny and her husband Ove worked hard over the years to improve glerups. Many machines and tools were invented and trashed to keep up with growing demand for this indoor shoe. Today, glerups “addicts” all over the world get their daily “fix” of 100% pure, natural wool that is still crafted with love and care from the sheep to your foot.*

*We hope you enjoy the “all year comfort” of your new glerups.*

# *comfort unlimited*

*— because your feet deserve it —*

## **HAND CRAFTED FROM 100% PURE NATURAL WOOL**

The wool is washed in soft water, then carded and felted. The felt is formed into socks, which are steam-felted for a perfect fit before soft calfskin soles are glued, then sewn on, for lasting durability.

## **HOW NATURE CREATES WOOL**

The technical wonder of wool starts at the root of the fiber. Before leaving the sheep's follicles each wool fiber is coated in sweat salts and grease (lanolin), which together form a perfect "clothing" for the sheep. The lanolin protects the wool fiber against sun, rain and wind. The lanolin and the lye in the sweat salts work together to keep the sheep clean. When the sheep gets wet, the basic salts of lye dissolve and together with the lanolin form a natural "soap" to keep the sheep clean. The sheep can keep the same "clothes" for many months without

being uncomfortable. glerups' soft water wash has the same effect. It activates the salts of lye and lanolin to create the natural "soap" just like in nature, to clean the wool.

In the wool fibers' outer layers, fat and protein are so tightly bound to each other that the wool fiber is completely closed to fluids. Water vapor can pass through to keep you comfortable while sweat cannot get into the actual wool fiber ensuring less perspiration odor to keep people around you comfortable.

Wool keeps the sheep's bare skin just the right temperature and it will do the same for your bare skin. We recommend that you try your glerups without socks. Wool and skin work naturally together.

# — Unforgettable — moments

## FROM FARM TO FOOT

*glerups started with wool from  
the family's own Gotland sheep.*

*But at glerups, we never stand still! Over the years  
glerups perfected the wool mix by blending Gotland  
wool with quality wool from New Zealand farmers.  
These farmers meet glerup's high standards for  
consistent quality and humane animal welfare.*

*We work with our farmers every step of the way  
and follow each pair of glerups from the sheep to  
your feet.*

# *True Danish* *craftmanship*

*After the sheep are sheared, glerups wool goes  
through many processes and hands to  
ensure the highest quality and a perfect fit.*

*We take our time to make it right.*

*This is true Danish craftsmanship,  
down on the farm.*

# *Hygge*

[ HOO GA ]

- 1. The art of building sanctuary and community of inviting closeness and paying attention to what makes us feel open hearted and alive.*
- 2. To create well-being. Connection and warmth.*
- 3. A feeling of belonging to the moment and to each other.*
- 4. Celebrating the everyday.*

#### HOW TO MEASURE THE LENGTH OF YOUR FOOT PROPERLY

1. Place the heel against a wall.
2. Measure from the wall to the tip of your longest toe.

#### NOTE:

One foot is often longer than the other, so measure the longest foot. For children add 10mm to the measured length, leaving room for small feet to grow.
